## A. MILTIMORE DIES AT ADVANCED AGE

We regret to announce the death of Augustus Miltimore, who passed to the great beyond on Thursday, March 19th, on the farm near Hesketh. Mr. Miltimore had reached the advanced age of 82 years and had resided in the Carbon vicinity for about 10 years, coming here from Oregon. He leaves to mourn his loss, a brother Arthur Miltimore, residing at Plainfield, Wisconsin, and several nieces and nephews.

The funeral services were held on Sunday March 22nd, at the United Church, Carbon, at 3 p.m. The Rev. Wm. McNichol conducted the service, and gave a most impressive address on this occasion. The service was attended by representatives of the Masonic Order, of which the late Mr. Miltimore was a life member.

The solemn rites of the Masonic Funeral Service were rendered at the graveside by the Carbon Lodge No. 107.

The pall bearers were: Bros. J.W. Burns, J. C. Chittick, J. Church, M. G. Sember, Archie McKinnon and Art Hunter.

### RATE OF SPEEDS ON WESTERN ROADS

In the prairie provinces the advantages of having regulations based on a reasonable and proper speed, according to the circumstances existing at the time, have been realized.

Alberta has no speed limit, but prosecutions are lodged when it is held that the motorist was travelling faster than was justified at the time, having regard to all the circumstances.

In Manitoba motorists must operate their cars at a reasonable and proper speed on the highways, but certain restrictions are provided for in cities.

Saskatchewan requires a speed that is reasonable and proper on highways, but loaded trucks are not to travel faster than 25, and unloaded trucks at a greater speed than 35 miles per hour. No motor vehicle is allowed to pass another on the highway at a greater speed than 35 miles per hour.

In British Columbia no person may drive at a faster rate than 30 miles per hour in open and 15 miles per hour in wooded country.

Meadow larks and robins are reported to have been seen in the district and the gophers have been out nearly all winter.

### WILL BROADCAST ARRIVAL OF GOVERNOR-GENERAL

The arrival of the new Governor General, the Earl of Bessborough, and his welcome to the Dominion will be broadcast direct from the pier at Hallifax to all corners of Canada, according to arrangements which have been made by E. A. Weir, director of radio for the Canadian National system. The Vice-Regal party will arrive in port at 10 a.m. on April 4th, and will be met by the Prime Minister and Secretary of State. They will come ashore at 11 o'clock and there will be a reception of about half an hour's duration on the pier, when the inspection of the Guard of Honor and other formalities will be broadcast. The swearing-in ceremony will be broadcast from the Legislative Building at noon. The whole historic event will be carried into all the provinces by a network of Canadian National Telegraphs and associated stations linked up from sea to sea.

### GRAVELLED ROADS CLOSE TO 1,800-MILE MARK

Alberta is rushing her gravelled highway program and will have 1,800 miles of gravelled roads, built to a standard by July 1st. There are more under construction. Just what additional work of this kind will be done during the current year has not been announced.

The province has at present 1,400 miles of gravelled roads, built to a standard and permanent construction. This includes the longest single section, from Carway at the international boundary to Clyde, north of Edmonton, a total distance of 450 miles. Then there is the route from Taber to the British Columbia boundary by Crow's Nest route, 145 miles, and from Edmonton to Vermilion, 143 miles.

Six major projects are under way, and 128 miles had been completed when the extent of progress was reported to the legislature. These were in part of the 1930 program, while, in some cases, work was continued during the present winter.

These projects are: Cooking Lake to Tofield; Lacombe to Sylvan Lake; Camrose to Daysland; Calgary to Drumheller; High River to Lethbridge; Cardston to Lethbridge. Completion of this work will give Alberta a total of nearly 1800 miles of gravelled highways. In 1924, the province had not more than 12 miles of such hard-surfaced roads.

## ALBERTA NEWS

Sunday afternoon at Drumheller marked the closing of the big ice palace, which has been operating for over four months, despite the mildest winter in Alberta's history. Not one hockey game had to be postponed owing to lack of ice during this long season.

The airplane beacon, located just east of Gleichen, has been moved out of the district. This beacon marked the course of the air mail before the route was changed via Lethbridge.

A valuable male silver fox escaped from the Hanson Bros. farm near Olds last week. The district was scoured for this valuable animal, which was later found after being shot by some hunter who took the animal for one of the wild species.

Burglars again visited Strathmore last week. They succeeded in getting into M.B. Garrett's, where cigarettes and gum to the value of \$15 was taken.

St. Paul is undergoing a great deal of activity in the building line in spite of the hard times.

Nine-year old Donald Parslow of Calgary got lost near the city on Saturday afternoon last and has not been seen since. Airplanes, police and blood hounds have been on the trail of the missing lad and some trace leads to the ice on the river, where some are of the opinion that he has come to his death by drowning. A Crystal reader claims that the boy still lives. The body was later found in the river.

Platinum has been discovered at Obed, 40 miles west of Edson. Many men rushed to the district to stake claims when it was learned that the ore assayed \$1100 platinum content per ton.

The Bentley Brothers, who played hockey with Drumheller this season, come from a family of hockey players, having four brothers besides themselves and six sisters, who indulge in the game.

Farmers are on the land in the Basano district.

### PUBLIC NOTICE

NOTICE IS HEREBY GIVEN that any person known to spread or pile up outside their premises any burning or hot ashes where they are liable to cause fire, will be prosecuted to the full extent of the law.

BY ORDER OF THE  
VILLAGE COUNCIL

### NEWS FROM THE SOUTH

Mr. and Mrs. John Pernan moved into their new home on Thursday.

Mr. Gottlieb Klein of Rosebud was visiting with Mr. and Mrs. J.S. Bertsch over Sunday.

Miss Netty Rempfer of Grainger is staying with her brother-in-law and sister, Mr. and Mrs. H. G. Kary.

Ewald Reule started to work on the W. Marshman farm on Monday. He is employed until fall.

Mr. and Mrs. Emil Schmidt moved to their new home, five miles west of Rockyford, on Monday.

Mr. H. G. Kary made a business trip to Calgary on Monday of this week.

A Bishop had been speaking with some feeling about the use of cosmetics by girls.

"The more experience I have of lipstick," he declared, warmly, "the more distasteful I find it."

She must be an optician's daughter for two glasses will make her a spectacle.

"How's your car running?"  
"Not so good. I can't keep it throttled down. How's your wife?"  
"Oh, she's about the same."

### ELKS' HALL WILL CONFORM TO LAW

## ELKS' HALL WILL CONFORM TO LAW

The Elks Hall, which has been closed to the public for the past three months, on account of insufficient doorways in the building, will soon be open for entertainment again. According to The Theatres Act a public hall must have three exits with doors opening outwards, one of these doors to be five feet wide and the other two 10 inches wide. According to this law the Elks hall must have one more door of 10 inches in width and the front door cut to five feet. This is the work that is now being arranged to be done.

To again officially open the hall, the Elks are putting on a dance on Easter Monday, April 6th. The posters are now out for this affair.

### FARMERS ON LAND

This week sees quite a number of the local farmers out on their land, discing, harrowing, etc. No seeding is reported yet, but it will not be long before some of the farmers will be putting in their seed. Other farmers in the district are busy cleaning seed, repairing harness and otherwise preparing for another crop, which they hope will prove more beneficial than the crops of the last two years.

It is expected that there will not be any reduction in wheat acreage in the Carbon district this year.

Since setting the above into type the district has experienced colder weather with a good snowfall. Farmers will now be delayed for a few more days.

### CROSS CANADA MOTOR TRIP PROVES FAILURE

Returning from an unsuccessful attempt to cross Canada by motor car, Healy F. Needham has reached Halifax. The venture came to grief when the car which he was driving overturned in the Lake Nipigon region in Ontario just forty miles from the point where a forest trail would have led him to the prairie country. He is still convalescing from broken ribs and an attack of pleurisy contracted at the time of the accident.

### NO NATURAL ANIMAL LIFE IN BERMUDA

Passengers arriving on St. Patrick's Day at Hamilton, Capital of Bermuda, were greeted with the fact that Ireland is not the only island in the world which is snakeless. The British colony of Bermuda harbours not a single snake. More than that, there are no reptiles of any kind on the island. Even further, there is no natural animal life of any kind save human beings and the domestic animals which they have raised in their tropical paradise. Curiously, too, there is no natural bird life. Not even seagulls, it is claimed are ever sighted around this group of coral islands.

### A 1931 Seed Time Problem

Seeding time throughout Western Canada is at hand, and, as the farmer overhauls his ploughs, harrows, and seeders in preparation for the Spring work, he naturally is looking forward and planning just what he ought to do in the light, not only of his own individual circumstances, but of prevailing world conditions and prospects.

The prairie farmer is an optimist, as a rule. Indeed, to succeed, he can hardly be anything else. Unquestionably, however, there is less optimism prevalent as the season of 1931 opens than is usually the case throughout this western country, and many farmers are in somewhat of a quandary in reaching a decision just what is best for them to do this year.

Most of them have been growers of wheat. It has been their major article of production. Upon it they have depended for success. But for the past year and a half wheat has been a drug on the world's markets. The selling price has fallen well below the cost of production. There is a large surplus stock on hand in various countries. What, then, is the prospect for disposing of a new crop of wheat at profitable prices in 1931? Yet the vast majority of prairie farmers cannot turn from wheat growing to something else in one short season, even if it was advisable to do so.

Under these circumstances should the farmer proceed to seed the average number of acres he has been seeding in years past? If he does and all the great wheat growing countries, as well as Canada, harvest an average normal crop, will the price obtainable for the wheat yield him a profit, or will it again fail to cover the costs of production and leave him in a worse position than if he had grown no wheat?

Inasmuch as the farmer cannot rest from growing something,—his livelihood depends on his production,—and as the prevailing prices for coarse grains also are less than production costs, the farmer is confronted with a real problem, and one he must decide for himself. Another crop failure, or partial failure, would be a disaster. Equally, a large crop throughout the world would mean loss to the producer. It is a gamble either way. If the Western Canada wheat grower could be assured of a good crop, while below average crops were the rule in other great wheat producing countries, his course would be clear. But as to this no man can foretell.

Possibly many farmers will consider it wise to merely seed sufficient acreage to provide him with a livelihood if all goes well, and devote his time to the eradication of weeds and the more thorough cultivation of his land in preparation for future operations, coupled with the planting and expert care of a garden sufficient to supply the needs of his own family during the summer and next winter.

A goodly number of farmers will have to look to the Government to supply them with seed; many others will not be able this year to buy registered seed, but whatever acreage is sown, be it large or small, should be seeded with good, clean seed, the best it is possible to obtain under the circumstances.

Generally speaking, too, farmers will have to keep down all overhead expenses. Last year's plough, harrow and seed drill will have to do service another year. Therefore, careful overhauling of all present equipment will undoubtedly be one of the outstanding activities on farms at this time. The farmer and his family may have to work even harder than usual and possibly get along with one hired man where formerly two were employed, even though this may operate to continue or temporarily intensify the existing unemployment.

In a word, everybody must face and adapt themselves to the hard, unpleasant facts of the existing situation. Present problems cannot be solved and difficulties removed solely by Governmental action, the extension of credits, or any other external agency or action. These may help, but at best, they are only temporary palliatives. Each individual must, in the final analysis, face his own problem, decide upon his own line of operations this Spring, work out the basic needs essential to his own salvation.

This article is not a preaching at farmers; it is not an attempt to advise farmers, for if there is one individual for whom the writer has a contempt it is the arm-chair critic, the arm-chair farmer. The existing situation, as the writer sees it, is that each and every man must exercise his own best judgement in the light of his own particular circumstances, and proceed with all the ability and energy of which he is capable to work out the solution of his own problems, and thereby make his contribution towards finding a solution for the problems of all others and the country as a whole.

The Hawaiian Islands are the peaks of mountains rising from a plateau thousands of feet below the ocean level.

Gossip is the mother-in-law of falsehood.

The average American eats about 18 pounds of tomatoes of the bottled and canned varieties in the course of a year.

According to Einstein's theory of relativity, light has weight.

### Suffered From Heart Trouble

#### Became Weak and Run Down

Mrs. Wm. Diotte, Glensandfield, Ont., writes:—"For a long period I suffered from heart trouble, and became very weak and run down. I tried various remedies, but they did me no good. One day I met a friend and told her of my trouble. She said she had had heart trouble for two years too, but after using Milburn's Heart and Nerve Pills for a short time she had been relieved of her trouble, so I got two boxes and after taking them I was again feeling fine, and always recommend H. & N. Pills to anyone complaining of heart trouble."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The Milburn Co., Ltd., Toronto, Ont.

### The Value Of Carbon

#### No Form Of Life Can Exist Without This Atom

The most wonderful substance in the world is carbon. Soot, lamp black, and pencil leads are all forms of carbon—and so is the diamond. The carbon atom possesses one remarkable quality. It enables other atoms to combine into huge groups or families from which all kinds of substances are made. By themselves, the atoms oxygen, hydrogen, and nitrogen can produce nothing very startling, but add carbon and their combinations become amazing, giving rise to such substances as petrol, oil, medicines, bread, and meat. If it were not for carbon, life could never have existed upon this or any other world. All kinds of living things—fish, flesh, fruit, and fowl—owe their existence to the carbon atom. No one knows why this should be so, for the carbon atom differs from others only in having one electron more or less than they. But it is quite certain that it is the foundation-stone of all life.

### Escaped From Russian Prison

#### English Engineer Under Care Of British Embassy At Warsaw

M. Thompson, an English engineer, has been taken care of by the British Embassy at Warsaw, Poland, following his escape from Russia. The man was found hanging under a car when the Moscow-Warsaw express reached Warsaw. He said that he had been working in a Russian factory and had been arrested by the O.G.P.U., the Russian secret police, and taken to a prison in Tomsk. He escaped and reached Warsaw by walking and by beating his way under trains.

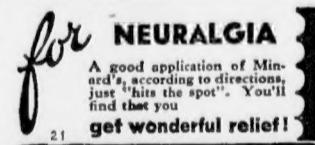

#### Would Say Plenty

Lemuel—What would your wife say if you bought a new car?

Samuel—Look out for that traffic light! Be careful now! Don't hit that truck! Why don't you watch where you're going! Will you never learn? And a lot more like that.

### White Hunters Protest

The Indians' right to trap beaver is contested by the white hunters of Fort Smith, in the northern part of Alberta. At a protest meeting, held recently, a number of the white trappers declared it was unfair to deny the white man the privilege of trapping the beaver, while Indians and half-breeds were allowed 15 beaver each season.

## Federal Government Issues Timely Advice Regarding Forest Protection In West

A statement on the forest fire situation in Western Canada has been issued by Hon. Thomas G. Murphy, Minister of the Interior, as follows:

"The well-being of the forest industries is so vital to Canada's general prosperity that the Federal Government must always retain an active interest in them. This interest necessarily includes serious concern with respect to forest fire losses. The Department of the Interior has a peculiar interest in the situation in the Prairie Provinces. There is, in the first place, the large area of federally owned forest in the National Parks which is endangered by fires in surrounding territory; there is the general responsibility for pressing forward the subject of forest conservation throughout Canada; and lastly there is the natural feeling of goodwill toward the new forest protective organizations of the Prairie Provinces, the majority of whose staffs have been recruited from personnel formerly connected with the field force of the Department of the Interior."

"Present indications are that these forest services are going to be faced with a very trying fire season during 1931. Weather conditions prevailing in Western Canada during the past three years have been remarkable for a continued deficiency both of snow and rain-fall. Added to the accumulated effect of the drought conditions experienced, there is the fact that throughout this region precipitation during the past four months has also been considerably below normal. The result is that lakes and streams are at very low level, irrigation storage waters being likewise affected.

"The forest fire season, 1929, was one of the most critical in the history of Western Canada. The season 1930 was likewise a trying one, although there was a considerable improvement over the year before in the matter of forest fire losses. This improvement was due in part to increased efficiency of fire protection, but particularly to a growing sympathy on the part of the general public, a state of mind that was given practical expression in efforts to co-operate in the matter of fire prevention.

"Inasmuch as the forest resources of the Prairie Provinces now belong wholly to the residents of those provinces it may be expected that public concern and public co-operation looking to reduction in fire losses will be even more evident. Nevertheless the mild winter and negligible amount of snowfall experienced throughout Western Canada to date means that, unless this region is favoured with exceptional precipitation in the next two months, the new western forest services must be prepared for a repetition of the extremely hazardous conditions which have marked the past three years. The efforts of these new services will have to be backed wholeheartedly by the general public because it will be only through the exercise of every precaution in the use of fire in or adjacent to the forest that disastrous fire losses in 1931 can be avoided.

"While the effect of forest destruction by fire is felt primarily in the region affected, nevertheless the losses incurred influence the general

economic situation throughout the country. It is with this point in mind that I would call the attention of our western citizens to the necessity of unremitting care in the use of fire throughout the wooded regions."

By Eva A. Tingey

CHARM AND MODISHNESS

All Tingey models are created and sketched in Paris and the patterns are made in New York.

There isn't anything any smarter than the black and white theme carried out in this model.

It's canton crepe. The cossack cuffs add snap to the Russian bodice in slim wrapped movement. The attached skirt is circular, shaped so as to give sleek slenderness to the figure.

It's perfectly marvelous for real formal wear and "Sunday night" occasions in black and white transparent velvet.

Black crepe woollen with scarlet red is chic.

Fashioned of one material as forest green wool crepe with its only contrast in shoulder trimming flowers and cuffs of eggshell pink pique is smart.

Featherweight tweed may also be used for this model.

This pattern may be obtained in sizes 16 to 20 and 36 to 42. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamp or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

## Results Of Research Program On Storage And Commercial Drying Of Damp Wheat

Further results from the extensive programme of research on the storage and commercial drying of damp wheat which the Research Council initiated in 1927, are contained in a draft report which Edgar Stansfield, Professor of Industrial Research, University of Alberta, and W. H. Cook, of the National Research Council staff at Edmonton, have submitted to the Council's Associate Committee on Grain Research Work, on which the final report will be made, is progressing.

In 1929 the Council published the report which set out the conditions then established under which grain could be dried without damage to its milling and baking quality. The investigation has been continued since that time under the general direction of Professor Stansfield. Mr. Cook constructed the improved drier that has been used and standardized the equipment and methods employed. The milling and baking tests so essential to the investigation were carried out in the co-operating laboratories of the Associate Committee attached to the Department of Field Crops, University of Alberta; Department of Chemistry of the Agricultural College, University of Manitoba, and the Department of Chemistry, University of Saskatchewan. The Seed Branch at Calgary, of the Dominion Department of Agriculture, made the germination tests.

It has been found that:

1. The efficiency of drying increased with the air temperature and decreased with the air flow. On the other hand, the injury to baking quality was affected more by the hot air temperature than by any other factor, and 180 degrees Fahrenheit must be regarded as the maximum safe air temperature. With air at 210 degrees, slight damage was occasionally observed, under ordinary conditions of drying while under extreme conditions, such as over drying, considerable damage was caused by air at this temperature. At still higher air temperatures, 240 degrees and 270 degrees Fahrenheit, the amount of damage increased not only with the air temperature but with the air flow. High wheat temperatures are to be avoided though not necessarily accompanied by damage.

2. The moisture content of the wheat before drying appeared to have little effect on possible resultant damage.

3. Drying in cold weather, when the air is excessively cold and dry seemed to increase slightly the risk of damage.

4. Drying very damp wheat in two

stages appeared to possess no advantage over the single stage method in preventing injury to baking quality. In fact, samples dried in this way showed slightly more damage than when dried in one stage and the drying operation was less efficient.

5. Drying wheat with single stream air (heating the air from the cooler section and forcing it through the heater section), gave a higher efficiency although the hot air contained more moisture. This method caused higher wheat temperatures, but no damage to baking quality resulted.

6. The effect of high atmospheric humidity was to reduce the efficiency of drying, and heat the wheat more, but it had no significant effect on baking quality.

7. Drying to a low final moisture content resulted in appreciable injury only when the air temperature was above 180 degrees Fahrenheit. At this temperature only slight damage took place on drying to as low as 10 per cent. moisture.

8. Batch drying experiments were carried out using air temperatures from 120 degrees to 210 degrees Fahrenheit only. No significant damage took place under these conditions, and both the efficiency of drying and the baking results compare favorably with continuous drying runs made under similar conditions. The higher maximum and differential wheat temperatures in the heater section suggest a greater risk of damage, however, and this method of drying is not recommended.

9. Wheat decreases in weight per bushel as the moisture content increases, and heat drying never brings it back to the original bushel weight. The extent of recovery is greater when the drying covers only a short moisture range, and when the wheat is dried at a slow rate.

10. Germination tests were tried as a possible index of injury, and although they showed qualitative agreement in many cases, their value as a check on drying operations is not yet proven.

### Fish From Moose Factory

#### First Commercial Fishing License Issued To Northern Centre

With the granting of a license to a Moose Factory commercial fishing company, that northern centre will ship fish this year to New York and Chicago for the first time in history. Although James Bay was discovered in 1631, it was only recently, it was claimed, that the first actual commercial fishing license was issued. Workmen already are constructing warehouses.

Late in May the first shipment will be made to New York. Large orders are said to have been secured from the United States cities.

### Tenacity Of Silk Thread

Because silk thread has greater tenacity than steel wire of the same diameter, an inventor in Germany has developed a cannon made of steel tubes wrapped around with silk until the required size has been obtained.

Customer (doubtfully)—Is it a pedigree dog?

Dealer—Pedigree! Why, if this dog could talk it wouldn't speak to either of us!

MARCH 29

#### REVIEW: JESUS THE WORLD'S SAVIOUR—PREPARATION AND POPULARITY

Golden Text: "Jesus of Nazareth . . . who went about doing good, and healing all that were oppressed of the devil; for God was with Him." —Acts 10:38.

Devotional Reading: Isaiah 35:5-10.

#### Questions Upon the Quarter's Lesson

##### For Young People and Adults.

1. How was the world prepared for the coming of Jesus?

2. What traits in the character and preaching of John the Baptist suggest the Old Testament rather than the new?

3. In what respects was John the Baptist a great man? What was his message?

4. What is the lesson for parents in the account of Jesus' first visit to Jerusalem?

5. At the beginning of His ministry, what conflicting ideals did Jesus settle, and how?

6. What are some of the standards set by Jesus in His Sermon on the Mount?

7. Can one live by the Golden Rule?

8. How did Jesus express the evil of punctiliousness without principle?

9. What is meant by "the stewardship of life," and how did Jesus teach the lesson?

10. What questions has Jesus answered, and how do His answers show His wisdom?

##### For Intermediates and Seniors.

1. Where is Palestine?

2. Locate the place where Jesus was born, the place where He lived until His baptism, and the place which was His headquarters during His public ministry.

3. How did the Boy Jesus treat His parents?

4. What were Jesus' first recorded words, and what was the occasion for them?

5. What was the message of John the Baptist?

6. In what way was Jesus tempted in the wilderness?

7. What is the Golden Rule?

8. What is a parable?

9. By what parable did Jesus teach the lesson of taking heed how one hears?

10. How did He teach the lesson that we must share with those in need?

##### A Review Of Important Words

Complete each of the following, and tell the occasion for its utterance.

##### Fourth Best Customer

Canada was Great Britain's fourth best customer in 1930, having advanced one place from the previous year, it was announced by the Department of Trade and Commerce after a report had been received from the British Board of Trade.

There is nothing repulsive in Miller's Worm Powders, and they are as pleasant to take as sugar, so that few children will refuse them. In some cases they cause vomiting through their action in an unsound stomach, but this is only a manifestation of their cleansing power, no indication that they are hurtful. They can be thoroughly depended upon to clear worms from the system.

##### Canadian Geographical Society

Dr. Charles Camsell, deputy minister of mines, was re-elected president of the Canadian Geographical Society at the recent annual meeting, the first and second vice-presidents being, respectively, C. G. Gowan and Dr. J. Macintosh Bell.

Quick action saves trouble, worry. Keep "Douglas" Egyptian Liniment always handy. Stops bleeding instantly. Cauterizes wounds. Hair comes back. No scar remains.

##### Altitude and Power

As an aeroplane increases its altitude, its motor loses much of its power, experiments conducted by the United States Bureau of Standards show. Tests conducted revealed that at an altitude of 25,000 feet a motor which developed 410 horsepower on the ground only developed 100 horsepower at that height.

##### New Baggage Device

A device by which baggage may be unloaded and taken on a plane in flight has been developed. Dropping a load into a chute, the plane's trail line is hooked onto the baggage which is automatically shot forward at the speed the plane is travelling.

A fountain pen for writing in dark places is equipped with a small flashlight.

### New Giant Cunard Liner

#### Interior Decorations To Be Most Elaborate Of Any Vessel Afloat

Continued rapid progress is being made on the new giant Cunard liner of 73,000 tons which is at present under construction in the yards of John Brown & Company, at Clydebank, Scotland.

Details have reached the local offices of the Cunard Line with reference to a number of the plans for the interior decoration of the liner which up to the present is without a name.

Mr. Eric Reford, vice-president of the Robert Reford Company, and general manager of the Cunard Line in Canada, in discussing some of the features which will be part of the new Cunarder, mentioned the fact that she will have an exceedingly beautiful church and that it will be decorated in accordance with the best traditions of English ecclesiastical art.

"The liner itself will have eight decks above the water line," he said, "and between the aft and the centre funnels will be built the largest dining room ever to be placed in an ocean liner."

"The boat deck itself will be 70 feet above the water line, and the tops of the funnels, which are forty feet across, about one hundred and thirty feet above. The boat deck is to be about 650 feet long and the promenade deck 720 feet long."

"I understand that the interior decoration of the Cunarder has not been settled, but I am sure that it will be the most elaborate that has ever been known on an ocean liner."

"It is fully expected that the construction of the hull will be well advanced by the spring," said Mr. Reford in closing.

"So you decided to quit being an atheist?"

"Yeah, there's no future to it."

The Chinese train cormorants, a species of bird, to catch fish for them.

### Head Colds Relieved with Vapors

Snuff Vicks up nose or melt in hot water and inhale vapors

### VICKS VAPORUB

OVER 17 MILLION JARS USED YEARLY

Nitroglycerol may be made to explode by hitting it with a hammer.

### La Grippe and "Flu" are Spreading

"Flu" First Appears as a Sore Throat, but Gains Tremendous Headway in Six Hours

### AN EFFECTIVE TREATMENT DESCRIBED

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop penetrates deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Experienced mothers know how valuable Nerviline is for Coughs, Colds, Sore Throat, and the little ailments that arise in every family. Nerviline in most homes is called "Mother's Best Friend." 35c at all dealers.

### Saskatchewan Poultry Pool

#### British Machines For U.S.

A British firm, the Wellman Smith Owen Engineering Corporation, Ltd., of Victoria Station House, S.W., has obtained a contract for the delivery of 1,000 tons of machinery to Pittsburgh, Pennsylvania, the heart of the American steel-producing country. It will mean the employment in England, of 600 men for six months. The contract is for machinery for the production of weldless steel tube.

### USES PINKHAM MEDICINES

#### Praises Vegetable Compound, Blood Medicine and Liver Pills

Birchtown, Quebec—"I live 13 miles from town on a farm, with all my home duties and churning to attend to. At the Change of Life, I became nervous and rundown. The Vegetable Compound helped my whole system. My nerves are better, my appetite is good and I am able to do my work. I have also taken the Blood Medicine and the Liver Pills and they helped me. I will answer letters from women asking about your medicines."—Mrs. RICHARD CHARLTON, Birchtown, Quebec.

### Make Your Windows Pay

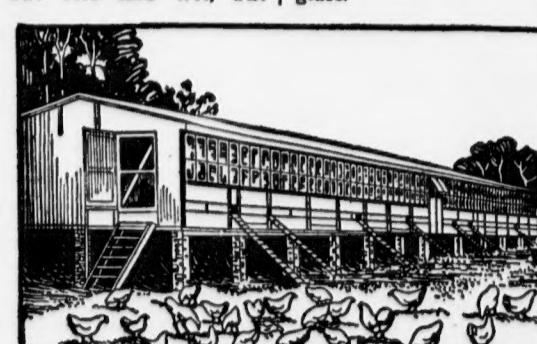

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

### WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

## SENATE HEARS ABOUT RELIEF WORK PROGRAM

Ottawa, Ont.—"I believe Canada should profit by the errors made by other countries," Hon. Gideon D. Robertson, Minister of Labor, told the senate in a reference to Great Britain's unemployed insurance scheme.

Along with many other people, both in Canada and Great Britain, Senator Robertson had been pleased when the scheme first was put in operation, he said. It soon was evident, however, that it was becoming a burden on the country as a whole and had not removed the basic causes of widespread unemployment. Canada, he suggested, might profit by the experiment.

As head of the department that administered the Dominion's share in the joint unemployment relief scheme with the provinces and the municipalities, Senator Robertson said he had received complete co-operation from all sides.

The scheme had resulted in \$69,000,000 being subscribed by the Dominion, the provinces, municipalities and the two large railway companies, to provide work and relief.

"The situation has been substantially improved," the minister of labor declared. Not only had the government provided \$20,000,000 toward creating employment opportunities, but it had raised the tariff to stimulate Canadian industry and had curtailed immigration to the country.

"I am convinced," Senator Robertson proceeded, "that if parliament had not met in September, and had not taken those steps to relieve distress, there would have arisen in Canada a condition very difficult to control. It is the desire of this government to give attention to a permanent solution. No one expected unemployment to be ended in a day or a week, but this government is doing all within its power to relieve conditions."

Hon. Robert Forke suggested the incorporation of a scheme whereby farmers' debts in Western Canada would be amortized over a 10-year period. In his 49 years' residence in the west, he had never seen conditions so acute and he believed something would have to be done to relieve the financial burdens of the farmers if they were to continue producing. For the first time, Mr. Forke had seen indications in the west of a lack of confidence in the future.

Senator Forke believed too much money had been loaned by the banks at too high a rate of interest and that mortgage companies were threatened with a loss of part of their equity in lands. A 10-year amortization scheme might be the means of solving this angle of the west's predicament.

Wheat growing was the only possible crop in some portions of the west, the former minister of immigration proceeded. He asked if times were hard in 1930, with wheat at an average price of 92 cents a bushel, what would they be in 1931 with 60-cent wheat? Senator Forke believed in the small-unit farm with diversified production, but he did not think this would materialize to any extent for some years.

Secession sentiment was not increasing in popularity in the west, Senator Forke declared. Expressions made in the past few months would not be taken seriously by other parts of the country, he said, but at the same time they could not be dismissed without consideration because they emanated from distress and discontent.

### Wreck Of Norwegian Vessel

Copenhagen.—Three passengers, one of them a five-year-old girl, and four members of the crew, perished when the Norwegian steamer "Hera" was wrecked on the rocks off Hammerfest, Norway, in a violent storm. Three of the crew members were women stewardesses. Fifty-five passengers and crew took to the boats and rowed to Hanoysund.

W. N. U. 1882

### No Cattle For Export

#### If Canadians Consume Same Amount Of Meat As Last Year

Winnipeg, Man.—Canada will have no exportable surplus of cattle this year if Canadians consume the same amount of meat as last year, declared Roderick MacLeay, rancher of High River, Alberta. Mr. MacLeay arrived from Ottawa, where he conferred with Hon. Robert Weir, Minister of Agriculture.

In Ottawa Mr. MacLeay, with George Ross, of Lethbridge, Alberta, represented the recently-formed council of Western Beef Producers at a conference with the Minister of Agriculture regarding cattle export situation.

Mr. MacLeay emphasized that the Canadian cattle industry was on a "decidedly home consumption basis." He deprecates reports of a "glut" on the export market for Canadian cattle. He pointed out that on January 1, 1931, there were 11,546,000 pounds of dressed beef in cold storage in the Dominion, as compared with 23,000,000 on the same date last year. The five-year average, he added, was 22,570,207 pounds.

### No Expansion Of Air Service Expected

#### Appropriation Compared With Former Years Likely To Hold Their Own

Ottawa, Ont.—No expansion in the air services of Canada is contemplated for the present year and it will likely be found, when the air estimates are tabled, that appropriations for this purpose will do little more than hold their own in comparison with former years, it was stated here.

Steady increase in the air vote has been an annual feature for several years past. Rigid economy is now demanded of those who direct Canada's air operations, however, and no appropriation will be set aside for expansion of existing services.

At the same time it is not contemplated that any reduction of the existing duties performed by the Royal Canadian Air Force will ensue, or that the present air mail services will be curtailed.

### Amend Criminal Code

#### First Reading Is Given To Bill In House Of Commons

Ottawa, Ont.—The House of Commons gave first reading to a bill amending the criminal code. The measure which was introduced by Armand Lavergne (Cons., Montmagny) provides:

1. In jury trials, defence counsel would address the jury after crown counsel had been heard in place of before crown counsel.
2. That judges should address the jury on questions of law only and not on fact.
3. That in Quebec province, presiding judge at such trials shall be a judge of the court of sessions of the peace.

### Would Entertain Royalty

#### King Of Siam To Pass Through Western Canada

North Portal.—It is expected that the border towns of North Portal and Portal will be honored with a call from the King of Siam on April 19. His Majesty and party will be passing through en route from Vancouver to Washington, D.C., on that date.

A Minot dentist, N. B. Livingstone, has sent the distinguished visitor an invitation to be his guest at a Minnesota Lake resort. Mr. Livingstone having met the then heir to the throne at that resort in 1922. The question as to where Uncle Sam will give the customary royal salute is not decided.

### Fishing Boat Case

Ottawa, Ont.—Seizure off the coast of British Columbia of four foreign fishing vessels by the Canadian fisheries patrol, is the subject of a case on which argument was concluded in appeal before the Supreme Court of Canada. Judgment was reserved. The vessels, "Queen City," "Tillie" and "Sunrise," registered in the state of Washington, were seized on June 18, 1930, while the vessel, "May," registered in Alaska, was seized a few days earlier.

### MAY RECEIVE APPOINTMENT

Hon. Capt. A. Lascelles, who, according to reports in one quarter, may be the secretary of Lord Bessborough, Canada's new Governor-General. — Photo by Pearl Freeman, Lond.

### In Interests Of Science

#### Canadian Doctor Faces Death As Result Of Experiments

London, Ont.—Dr. Wray Lloyd, graduate of University of Western Ontario, and one of the most promising of the young scientists working under the wing of the Rockefeller Institute, is facing death for the second time as a result of experiments.

Dr. Lloyd contracted yellow fever from monkeys with which he was working in his New York laboratory.

His condition is not regarded as critical, but doctors point out that the tropical disease is always dangerous.

In 1928, while studying the heart at the University of Western Ontario Medical school, Dr. Lloyd created quite a sensation when he announced that by using calcium chloride as a stimulant he had caused hearts taken from dead rabbits to resume beating.

Desiring to find out the effect of the drug on the human heart, Dr. Lloyd had his assistant inject a small quantity into his arm. The young doctor became suddenly unconscious and death was close before he revived.

### To Broadcast Arrival Of Governor-General

#### C.N.R. Chain Will Carry His First Speech As Far As Vancouver

Winnipeg, Man.—The Canadian National Railways radio system has been officially authorized to broadcast, over a coast-to-coast network, the arrival of the Earl of Bessborough, governor-general designate, and his welcome to Canada by the prime minister. The new governor-general and his family will reach Halifax, Saturday, April 4, at 7 a.m. M.S.T. The addresses of welcome and Lord Bessborough's first speech in the Dominion will be carried on a chain that will stretch as far west as Vancouver, according to E. A. Weir, director of radio for the Canadian National system.

#### Duty On Fuel Oil

Ottawa, Ont.—An adequate duty on foreign fuel oil competing in the fuel market of British Columbia, was asked by a deputation from Vancouver Island, which waited on Premier R. B. Bennett. The prime minister gave a very sympathetic hearing to the representations of the delegation and promised the matter would receive full consideration by his government before the close of the session.

### Cities Linked by Air

Inauguration of air service between Saint John and Halifax, February 28, when a Fairchild plane, of the Canadian Airways, left the former city for the Nova Scotia capital, marked the further extension of air travel in the Maritimes. In the cut Walter Bate, Saint John superintendent, Canadian Airways, is handing the pilot of the plane, Captain W. H. Irvine, a package of silk goods consigned by Canadian Pacific Express to a Halifax retail store. The trip was made in an hour and a half, a distance as the crow or an airplane flies, of about 125 miles.

### U. S. ADHERES TO ITS POLICY OF ALOOFNESS

London, England.—United States policy of aloofness from purely European armament problems has been adhered to in a decision made public at the conclusion of two days of conversations between Rt. Hon. Arthur Henderson, British foreign minister; Rt. Hon. A. V. Alexander, first Lord of Admiralty; U. S. Senator Dwight W. Morrow, and Ambassador Charles G. Dawes.

It was declared that the United States would not participate in any way in the drafting of the new Anglo-French-Italian naval agreement at the foreign office. While the United States will not participate in framing of the pact, official U.S. opinion, echoed here, was that the tripartite agreement is an important and successful move toward settlement of European armament problems.

The only concern of the United States, it was said, is in regard to the world naval situation and the relation of the new accord to such existing naval agreements as the Washington Treaty and the Pact of London.

It was learned on high authority that U.S. experts on disarmament view the tripartite agreement as supplementing the London treaty of 1930 without conflicting with that pact or calling for any changes in it. It is now believed the Japanese government will also decide not to be represented.

Washington, D.C.—Secretary of State Stimson received assurances from Ambassador Charles G. Dawes, in London, England, that satisfactory progress was being made in Europe toward completing the Franco-Italian naval accord. The secretary said it appeared that U.S. participation on a committee to draft the Franco-Italian settlement would be necessary.

It was considered possible that the final draft might necessitate only the signatures of France and Italy. The question of British signatures is still open for determination.

### To Employ Local Men

#### Manitoba Workers To Be Used On Construction Work At Churchill

Winnipeg, Man.—Labor's request that only Manitoba workers be employed in construction operations at Fort Churchill, Manitoba's northern seaport, will be acceded to as far as possible by the Dominion Government.

The Winnipeg Labor Council recently requested the government to employ only Manitoba labor at Fort Churchill and apply the Manitoba fair wage schedule.

Hon. R. J. Manion, Minister of Railways, informed the council that Manitoba "certainly will get a large proportion of the work." He added, however, that it was not possible "to give it all to one province as some men have to be hired from elsewhere because of special qualifications."

#### Ready For Delivery

Ottawa, Ont.—Delivery of the first of Canada's new destroyers, H.M.C.S. "Saguenay," will be made to this country on or about April 1. A number of tests have still to be made but it is expected that a Canadian crew will be put on board the warship around that date and will formally pass into the hands of the naval service of this country.

#### Find Ruined Temple

Athens.—Ruins which he believes to be those of the first Temple of Eros, God of Love, have been found by Prof. Brognard, of the American Archaeological School, on the northern slope of a hill mentioned in the records of the famous Greek geographer, Apusianas.

#### Menace To Aluminum Trade

Tokyo, Japan.—A menace to Canada's aluminum trade with Japan looms up in a scheme that has now reached the formative stage, to supply all of this country's requirements of this metal by a plant to be established in Choken (Korea).

## DON'T GRUMBLE

Don't grumble about your business. It is reported that a man went into a clothing store in a neighboring town to buy a suit of clothes. The merchant grumbled so much about how everything was going to the bow-wow that the would-be customer came to the conclusion that if times were so bad he had better make the old suit do another year, and walked out of the store. If a merchant grumbles his patrons will grumble, and it is a disagreeable situation when every body is grumbling.

## LITTLE DEBTS

Among the countless solutions of the trade depression problem advocated by wise men, soothsayers, necromancers and astrologers, there has not, until this week, been suggested the simple process of liquidating the burden of small debts already contracted so that the way may be clear for the granting new credit. A Woodstock, Ontario judge has, however, set the ball rolling by committing a man to jail for spending on luxuries the money that should have paid a small account long past due. Human nature revolts at thought of reviving the jail penalty for debt, as applied in times past. But much might be said in favor of discriminating compulsion in the collection of small debts. It is not far from the mark to say that a general liquidation of small accounts would do more to revive prosperity than all the pretentious relief features, moratoriums and doles that frenzied finance has sanctioned. Laxity in debt enforcement has fostered the craze for luxuries and non-essentials resulting in contempt for obligations which used to be held sacred. The legislature and the courts are doing a good service in protecting debtors made so by adverse fortune.

But they might do a still braver service by providing an inexpensive means of applying thumbscrews to such as can pay, but will not.—Estevan Mercury.

More precious than diamonds to the bearers of the white man's civilization is paper. On it are jotted down the schemes of organization, government and industry. It is the common carrier of information, memoranda and useful facts—helping always to get things done. Keeping the lines of communication open it renders a service that can be truly appreciated only when one thinks of a country, new or old, without paper.

TRANSPLANTING THE  
SASKATOON

(Experimental Farm Notes)

Native and hardy though it is, occurring as far down the Mackenzie as the Ramparts, within fifteen miles of the Arctic Circle, the saskatoon bush is often unsuccessfully transplanted. Hundreds of people have had experience similar to that met by the writer in his first trial, when the whole bush was moved, the top not being cut back at all. After a while a few spindly shoots grew up around the base. Presently they shrivelled up, the dried-out wood toppled and the attempt ended in failure.

It was noticed, however, that where a saskatoon patch was ploughed thru' in breaking and was left a few weeks, numerous long white shoots would be

found issuing from the knotted, club-like root masses. If they were left undisturbed for a year or two a vigorous new growth would spring up. It seemed plain that anything which would volunteer so successfully must be capable of being transplanted.

In accordance with this hint from Nature the next attempt was made by grubbing out the club masses of roots turned up by the breaking plow, chopping off most or all the top and strewing the roots thickly into a furrow, which was then filled up as a

potato drill might be. In cases a stump of top was left protruding; in others none. As a matter of convenience the planting was done in July. Growth was slow but sure. During the first summer the aerial stems did not become over 2 or 3 inches tall. The next year they grew six or eight inches; the third perhaps one and a half or two feet. All that established themselves survived, and few things on the Beaverlodge station attract more favorable attention than the two long hedges of saskatoons.

Commercial fruit production in Canada in 1930 had a value of \$19,-24,970. Apples accounted for \$10,-863,940 of that total.

For the year ended May 31, 1930, a total of \$2,037,678 was spent in Canada for cut blooms showing that Canadians still have a strong penchant for saying it with flowers.

As a barometer of business conditions in Nova Scotia it may be stated that in 1930 there were 129 new companies incorporated as compared with 118 for the previous year.

A consignment of 120,000 pounds of dried hake from Digby has been shipped by way of Yarmouth to Rio de Janeiro, Brazil, and Nova Scotian exporters believe this may be the beginning of a steady trade in this line.

Over fifty per cent. of the raw leaf tobacco used in the Canadian tobacco industry is now produced in Canada. Less than two per cent. of the tobacco consumed in the Dominion is imported in manufactured form.

At end of February 7,621,980 bushels of wheat had entered Saint John over Canadian Pacific lines as compared with a movement of 3,659,677 bushels during the similar period of 1930.

Two Chinese babies hold the distinction of being the first infants born aboard Canadian Pacific liner Empress of Japan. The births occurred on a recent voyage and were reported on arrival of the ship at Vancouver.

Public rooms on the Empress of Britain which will arrive at Quebec on its maiden voyage June 2, all bear distinctive names. The dining saloon will be known as "Salle Jacques Cartier," the ball room as the "Empress Room," and the lounge as "Mayfair."

Total estimated revenues of the province of New Brunswick for 1931 is set at \$6,302,821 according to the financial estimates presented in the provincial legislature recently by the provincial secretary-treasurer in his sixth budget speech.

When H. R. H. the Prince of Wales opens the British Trade Fair at Buenos Aires, March 14, his address will be broadcast throughout Canada by the combined efforts of the Canadian Pacific and Canadian Marconi companies. The broadcast will start about one p.m. Eastern Standard Time and will last between 20 and 30 minutes.

Inauguration of air service between Saint John and Halifax occurred recently when a Fairchild plane of the Canadian Airways left the New Brunswick city with passengers and express for the Nova Scotia metropolis. The trip of 125 miles was made in an hour and a half.

"In most parts of western Canada if you ask a business man as to general conditions in his locality, the answer you receive in a surprising number of instances is that they are better than people in the east seem to think and that signs of improvement are by no means wanting," was the summary of impressions of his just concluded western tour by E. W. Beatty, chairman and president of the Canadian Pacific Railway.

## RHEUMATISM

15 Convent sisters say  
there's nothing  
to equal Kruschen

This letter is not one person's opinion; it is the unanimous vote of the sisters of a large convent.

"We are a large community (15 in number) and find no medicine to equal Kruschen Salts. Many of the sisters are troubled with Rheumatism, which necessitates taking more than the daily dose . . . We cannot speak too highly of Kruschen Salts, and the benefit we derive from them."—Sister M.J.

The natural treatment for rheumatism is Kruschen Salts. The six mineral salts of Kruschen have a direct effect upon the whole blood stream, neutralising uric acid, which is the recognised cause of rheumatism. They also restore the eliminating organs to proper working order and so prevent constipation, thereby checking the further formation of uric acid and other body poisons which undermine the health.

### FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We have distributed a great many gratis "GIANT" packages which make it easy for you to prove our claim for yourself. Ask your druggist for the new "GIANT" 75c package. This consists of our regular 75c bottle together with a separate trial bottle—sufficient for about one week. On the trial bottle first put it to the test, and then if you are convinced of Kruschen's value do everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorised to return your 75c immediately and without question. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by E. Gulliford Hughes, Ltd., Manchester, Eng. (Estab. 1756). Importers: McGillivray Bros., Ltd., Toronto.

CHAPTER XIII.—Continued.

"Thanks," said Gay. "You're getting gallant in your old age. I should never know you for the boy who used to pull my pigtails when the teacher wasn't looking."

Angela Halliday was still away from home. Her cruise had ended in a visit to another friend, and as she asked no questions, nor suggested that he join her, her husband said nothing about the small guest who was occupying her room, since it was the only one connecting with the sleeping porch. James Halliday himself had abandoned his hot bedroom in the ell, and was using the guest chamber; and his household had settled into a routine that revolved about the tiny creature who blossomed visibly under their tender care.

"You'd think she was royalty," said Julie, one evening when she ran over to get Gay's recipe for sponge cake. "Nothin's too good for her accordin' to Mr. Halliday. You see that lovely doll he sent clear to Boston for; and now it's a kitten—a live one. Gee! I wonder what Mis' Halliday would say if she could see her room! It's a regular nursery. I see the kitten on her toilet table this mornin', sittin' right beside a jar of imported facial cream. As for him—he just sits there and worships the little thing. Her name's Martha. It was his mother's name and that seemed to please him

a lot. It's plain he thinks the world an' all of her; and she—well I ain't never seen anything queerer than the way she takes to him an' his long face. She won't go to sleep nights till he's been up and set with her a while."

"I think it's beautiful," said Gay. "I hope he'll never send her away."

"You do, do you?" asked Julie. "Well, I'll tell the world I don't think Mis' Halliday's make no suitable mother. She ain't the kind. Maybe she'd be willin' to pick out the kid's clothes, but that's as far as she'd go or my name ain't Julia Amanda Nipps. I hope she'll give us plenty o' notice when she comes home. It'll take some hoppin' to get things back like they was before. For a lady that looks like an angel on a Christmas card, I'll say she makes things fly when they don't suit her. Lordy! I wouldn't want to answer for the consequence if she got home unexpected and found things like they is now."

Yet that is exactly what happened. It was the next afternoon that a taxi stopped before the Halliday door, and deposited Angela, accompanied by a rather sporty looking couple, whose tweeds appeared singularly out of place in the Bakersville heat. The nurse had gone out, and Halliday was in charge of the little patient whom he had just brought in from the garden. She was taking a few unsteady steps, clinging to his hand, when the door opened to disclose Angela, whose look of blank astonishment as her eyes fell upon her husband and the little girl, made her words sound mild.

"Where in the name of goodness did that come from?"

She made no move to greet Halliday, and the child, attracted by a beaded bag which swung from Angela's wrist, made a quick rush in her direction, stretching out eager hands which Angela evaded by a sudden backward step. Perhaps the little girl had unconsciously expected help at just this point, for she lost her balance and would have fallen had not Halliday caught her, lifting her in his arms while she buried a frightened face against his shoulder.

"We were not expecting you," he explained. Then glancing at the two figures behind her, "You might, my dear, introduce me to your friends."

In the tension of the moment Angela had forgotten her guests. Now she turned to them saying: "I beg your pardon. Let me present my husband. Jim, these are my friends the Myers, in whose yacht I had the pleasure of cruising. They wanted a taste of rural New England before going West again; so I brought them to Bakersville. Who is that child? She's certainly no beauty. Send her home, please; and would you mind asking Julia to put clean towels in the bathrooms? We're about to expire of heat."

Halliday moved forward, little Martha still in his arms, and stretched out a hand to the Myers, both of whom were obviously ill at ease.

"I'm sorry," he began, "but I shall have to ask you to cool off as much as you can down here, until I've had time to make some changes. Mrs. Halliday didn't warn me of her arrival, and we're a bit upset because of this small guest."

Guest!"

Angela faced him, and instinctively

## PAIN after eating

What many call "indigestion" is very often nothing but excess acid in the stomach. The stomach nerves have been over-stimulated, and food sour. The corrective is an alkali, which neutralizes acids instantly. The best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard anti-acid with physicians for more than 50 years since its invention.

One spoonful of this harmless, tasteless alkali will neutralize instantly many times as much acid,

(Made in Canada)

and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this more pleasant way. A small bottle is sufficient to show its merit.

Be sure to get genuine Phillips' Milk of Magnesia prescribed by physicians for more than 50 years in correcting excess acid. 50c a bottle; any druggist. Complete directions for its many uses are enclosed with every bottle.

The Genuine Milk of Magnesia is always a liquid—never a tablet. Look for the Phillips' name on bottle.

## If baby has COLIC

A CRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and can never harm. It is the sensible thing when children are ailing. Whether it's the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

**Fletchers' CASTORIA**

ly the child shrank back, clinging to her protector with a frightened whimper.

"It's all right, Baby," soothed Halliday. "Don't be afraid."

He looked steadily at his wife, as if taking measure of the circumstances. The guard of innocence had left her eyes, and he made a quick decision, turning to the Myers, as if an explanation were due them.

"You see, my wife had the misfortune to run over this little girl with her automobile. She was very badly hurt, and is just recovering. As she had no suitable home I brought her here to convalesce; but it will be a simple matter to arrange things if you'll give me an hour's leeway."

"Look here," protested the gentleman in tweeds, "it's absurd for us to upset your household. Isn't there a hotel nearby, or—"

"It is more absurd," broke in Angela suddenly, "to have the child here at all. She's only a State ward, and not used to such surroundings. We can easily return her to the woman she lives with. Come upstairs, Amy" (speaking to Mrs. Myer). "My room, at least, will be undisturbed."

She turned to Halliday, but did not meet his eyes as she added: "Will you see to sending the child back at once, Jim?"

Little Martha may not have understood what Angela said, but she sensed trouble and began to cry, clinging tighter to Halliday's neck.

"Hush, Martha," he said gently, "I shan't send you away. Angela, my dear, if you'll take your friends into the living room I'll ask Julie to make you a cold drink; and things will be straightened out upstairs in no time."

"But my own room," she began irritably, when he interrupted: "Your room is in use. You may have forgotten that it's the most comfortable in the house, and the weather has been unusually warm. If you had dropped me a line everything would have been ready. As it is, I fear I must ask you to be patient for an hour."

Shrugging, Angela led the way into the living room followed by her guests, who exchanged bewildered glances as Halliday turned about. He had scarcely reached the improvised nursery, however, when his wife was beside him; and setting small Martha on her feet, he faced the woman's angry countenance. Her eyes swept round the room—past the small white bed upon the porch—back to where the grey kitten slumbered peacefully on a silken cushion, and her temper, already perilously on edge, gave way.

Lifting the beautiful beaded bag she threw it furiously at the unconscious kitten; while the little girl burst into wild weeping at the animal's squeal of fright and pain. "You're bad!" she sobbed, facing Angela with tear-drenched eyes. "You

## The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

Yes, Sir, that bear just poked his face out from among the bushes and looked at us. We had no gun—but even a knife. It was a great brute of a grizzly, and with her came a half-grown cub. Probably you have never seen a grizzly loose in the mountains. If you haven't, you have no idea how big one looks. This one seemed to be as big as an elephant, and she looked as mean as poison. It was growing darker every moment and in that darkness, as we sat here, I could almost anything might have happened. Mrs. Grizzly is a bad one to meet at any time, but when she has a cub with her, she is not the company one would choose to meet in a lonely spot.

Meanwhile the old bear was getting nervous—sort of sniffling around a big—well, she and her cub started down or look us over.

Very likely we should have shouted and waved our arms and yelled "Shoot! Shoot!" but I never saw a grizzly that one could talk out of an idea.

No sir! We did no such thing—we cut and ran pell-mell for the plane. It was less than a hundred feet away but it seemed as if we would never make it. And all the time the bear and her cub were ambling briskly toward us. I reached for the pot-

cock of the gas tank, turned it on and held my coat under it until it was full and soured it over the wings of the plane. Time and time I emptied the helmet of gasoline on the plane—and every time I looked up, there were those bears coming closer. As I threw the last helmet of gasoline over the plane, I looked up, and there—just across the plane—were the bears. Believe me, girls and boys, those bears weren't sightseeing—they were out hunting trouble—and that particular trouble was us. I tried to light a match, and did you ever try to strike a match in a hurry? The first one didn't light at all—the second broke—but the third one lighted. I held it to the edge of the wing—and it seemed as if it would never

hurt my kitty and he runned away. You're bad!"

Without a glance at his wife Halliday lifted the child gently, carrying her downstairs and across the garden where Gay sat sewing on the porch. Had he known all that his face revealed he might have found some other way; but his voice was steady and he had not counted on the havoc that ugly scene had wrought. Martha still wept, but her sobs grew fainter as she saw the little boys building block houses.

"Why, what's the matter?" asked Gay with ready sympathy.

"There's been an accident to the kitten," explained Halliday, after setting his burden down beside the boys. "I've come to ask a favor, Mrs. Hastings. I—my wife has come home unexpectedly, bringing guests. It will be necessary to have the

rooms we have been using. I wonder if for a time you—you—"

"Of course!" smiled Gay, instantly grasping his dilemma. "We've plenty of room in this old house. Send the nurse over when she returns, and leave Martha now. I'm glad you asked me, Mr. Halliday."

(To Be Continued.)

### The Daily Round

Whatever we are, high or lowly, learned or unlearned, married or single, in a full house or alone, charged with many affairs or dwelling in quietness, we have our daily round of work, our duties of affection, obedience, love, mercy, industry and the like; and that which makes one man to differ from another is not so much what things he does as his manner of doing them.—H. E. Manning.

## FEEL MEAN?

Don't be helpless when you suddenly get a headache. Reach in your pocket for immediate relief. If you haven't any Aspirin with you, get some at the first drugstore you come to. Take a tablet or two and be rid of the pain. Take promptly. Nothing is gained by waiting to see if the pain will leave of its own accord. It may grow worse! Why postpone relief?

There are many times when Aspirin tablets will "save the

day." They will always ease a throbbing head. Quiet a grumbling tooth. Relieve nagging pains of neuralgia or neuritis. Or check a sudden cold. Even rheumatism has lost its terrors for those who have learned to depend on these tablets.

Gargle with Aspirin tablets at the first suspicion of sore throat, and reduce the infection. Look for Aspirin on the box—and the word Genuine in red. Genuine Aspirin tablets do not depress the heart.

MacK's Drug Store has just received a new coat of paint and the appearance of the building has been greatly improved. Jas. Gilbert, the local painter, did the work.

### JESUS IS THE MIRACLE OF MIRACLES

(Rev. Wm. McNichol)

Jesus is the miracle of miracles. That He should be the point around which all the thoughts, hopes, and aspirations of the human race still focus, is the marvel of human experience. Any careful reader of both ancient and modern history will easily recognize that He is the central figure of all history both ancient and modern.

No man can think intelligently of the last nineteen hundred years without thinking in terms of the person and message of Jesus for He is a part of these years. You cannot disentangle the literary memoirs of His life from the literature of the English speaking world. His roots have gone down into the crannies of our thought and life. He has got hold of our thinking processes. We judge all things by Him. We evaluate life by His standards. "After two thousand years we are not able to give Him up. The fact of Bethlehem has become the fact of the Universe, and the Light on the hills of Judea has become the Light of the world. Christ is our eternal Contemporary." This is the miracle of Jesus personality.

Contrary to popular belief, Christ has conquered superstition, magic, and witchcraft, and other primitive, unscientific attitudes of mind. He leads men's minds in their search for truth. He urges them to experiment. He bases His appeal on knowledge. He stirs the intellect. He encourages investigation, and promises that God will validate and vindicate such efforts. This is the miracle in the mind.

And this is the miracle in the spirit. He turns the fear of men into joy. He was the dispenser of human happiness, and the consistent preacher of joy. Fear grips humanity, but Jesus conquers it by His conception of God as a loving father, by His gospel of the supremacy of spiritual values, and by His confidence in victory for the spiritual enterprise. Yes, Jesus has given men "deathless joy."

He has performed also a miracle in redemption. He incarnates love in human life. He puts love at the center of the universe. He dares to assert that God is suffering love, and demonstrates it on the cross. The human heart needs and craves this love. It is the only way to redeem the world. God had it in His heart at the beginning of creation to redeem the children through love, and He will love and suffer, and suffer and love until the last one of His children comes back to His home and to His heart.

A similar miracle is found in what He revealed. First there is the catholic quality of His person. Then He sets forth a new and compelling goal for personal and social endeavour. All classes of men, and all types of mind find in Him, and His gospel the satisfaction for their finest aspirations. And "He is still ahead of us. He is at the forefront of the centuries, and at the end of every road we meet Him. All existence is a manifestation of one self-revealing, self-renewing life," the life of a God whose purpose is found in Christ.

N.B.—Paul B. Kern's recent book, "The Miracle of the Galilean," discusses this subject quite fully.
